Fast Drying Performance

Dexter DL2X30QSS's have the reputation for being the best performing stack dryers available.

By using a "stacked" design, laundry owners can increase drying capacity without using up valuable retail space. Single gas, electrical, and venting connections simplify installation.

Engineered to increase customer turnover in a commercial laundry, Dexter stack dryers perfectly balance airflow, heat, and tumbling action. Fully perforated- large diameter cyclinders, high CFM, and energy efficient heat reclaimers guarantee fast drying results.

Dexter stack dryers are built to last. A heavy-duty welded steel frame, and stainless steel doors resist wear and tear. Optional stainless steel front panels and stainless steel cyclinders keep Dexter dryers looking attractive for a lifetime. Extra large lint screens are easy to clean and maintain.

This model is covered by Dexter's limited 2/4/5 year warranty and is available for sale at all Authorized Dexter Commercial Laundry Distributors.

Dexter Advantages:

- * **Better Drying Performance** (fully perforated cyclinders, more airflow, better tumbling action)
- * **More Energy Efficient** (heat reclaimer, instant ignition)
- * **Quality Components** (solid welded steel cabinet, rust protection and interior paint)
- * **High Value** (reliable performance in a proven design)

model: DL2X30
